

To Whom It May Concern:

Over the past 2 ½ years beginning as of late 2006, I have been fortunate enough to become the physician for several individuals who reside at ETD Senior Home Care Inc. owned and operated by Olivia and Marinell Iliuc. As the population ages, examples are needed which demonstrate how to provide quality care for elderly individuals who have increasingly complex physical and emotional needs.

Either Olivia or Marinell accompany each resident for all medical and other health care appointments. They are very knowledgeable as to the care needs of each of their residents including medication compliance, medication side effects, medical diagnoses along with the subtle alterations in each individuals health and mood as related to these diagnoses which can be easy to overlook. Accurate medication lists and vitals records especially as related to blood pressures and weights are provided at each visit.

It is obvious that they have established a personal relationship with each of the residents entrusted to their care. At each visit, the residents/patients are well dressed and appear very comfortable and generally happy unless some type of medical issue is bothering them which is to be dealt with at the medical visit. Although proactive in terms of addressing and treating medical issues, Olivia and Marinell have also exhibited an openness to hospice referral if it seems clear that ongoing aggressive medical treatment will be associated with more potential harm than good as end of earthly life is approached.

I would without reservation recommend ETD Home Care Inc, to anyone considering an adult family home for themselves or their loved ones.

Sincerely,

Lester R. Sauvage Jr, MD
